# 2010 Lance camper floorplans

# basic tech specs

**Cabover interior headroom height** measured from cabover floor (without mattress) to highest point in cabover ceiling.

**Truck bed height** measured from camper's truck bed plate to roof (without air conditioning unit, satellite TV antenna or roof storage system) - including the seven inches for the top of roof ladder.

**Overall exterior height** measured from camper's retracted legs to roof (without air conditioning unit, satellite TV antenna or roof storage system) - including the seven inches for the top of roof ladder.

**Center of gravity** is the balance point of a base-weight camper (with propane and all fluids except black and grey holding tanks) loaded onto a truck - and is measured from the point of contact (the truck's tail lights) forward towards the truck's cab.

**Dry weight** based upon standard base model features - not including options or dealer-installed items.

## truck + camper compatibility guide

The following are general guidelines to use when matching a Lance camper to your truck, and assumes standard equipment on both the truck and camper. Whether any camper can be used with your truck is dependent on your truck configuration (2WD vs. 4WD, standard cab vs. extended cab, etc.) and its capacities for carrying and/or towing - how much optional equipment is added to the camper - what you tow - and the weight of passengers and all other items you carry in your truck and camper.

Because we're unfamiliar with your specific truck and how you intend to use it, Lance makes no warranties or representation - express or implied - as to the performance or reliability of your truck with a Lance camper.

**For professional guidance, always consult with your Factory Authorized Lance Dealer. They're trained in properly calculating truck/camper packages.**

Compatible with domestic F-350/3500 Series (and larger) dually long bed trucks

**1181 1191**

# Lance 825

Compatible with import full-size (Toyota® Tundra™/Nissan® Titan™) short bed trucks

Compatible with most domestic light-duty F-150/1500 Series (and larger) short bed trucks

Whitewater Interior

This high-quality truck camper has **everything needed to enjoy the outdoors at a modest price, and with less weight.** The 2010 Lance 825 is light enough to fit on a Toyota Tundra, Nissan Titan, or F-150/1500 Series short bed (a truck bed with a minimum of six feet). When the weekend calls, you can relax and have fun in your new Lance 825. **Visit [LanceCamper.com](http://LanceCamper.com) for more info.**

When the great outdoors calls and you're in need of two separate sleeping areas and lots of storage, then the new 2010 Lance 830 is ideal for short bed trucks (which have a minimum bed size of six feet). Built with a European feel and Lance flair for versatility, this camper will transform into a chef's dream galley with extra counter space or a comfortable area to view a movie or watch TV. Storage is always key to choosing the perfect camper. And on a grading scale, we think you'll give the Lance 830 an A+. Visit [LanceCamper.com](http://LanceCamper.com) for more info.

Compatible with domestic heavy-duty  
F-250/2500 Series (and larger) short bed trucks

# Lance 830

# Lance 850

Compatible with domestic heavy-duty F-250/2500 Series (and larger) single-rear-wheel long bed trucks

Gold Rush interior

Have a long bed truck and a heavy load to tow? Then the 2010 Lance 850 is ideal for an owner of a long bed F-250/2500 Series or larger truck. This camper will allow you to tow directly off of your existing truck receiver, so you can **achieve your maximum GCVWR** (gross combined vehicle weight rating) on the truck. The 850 camper has many of the features found in Lance's larger campers. **Visit [LanceCamper.com](http://LanceCamper.com) for more info.**

The 2010 Lance 992 is a double-slideout model that has the feel of much larger camper. The kitchen is fully functional either with the galley slideout retracted or deployed – so making a sandwich while on the road is doable. Counter space is abundant on the 992, and there's ample storage throughout, too. The wet bath design is deceiving – as it actually has more cubic space for a shower than any other camper Lance builds.

Visit [LanceCamper.com](http://LanceCamper.com) for more info.

Compatible with domestic heavy-duty F-250/2500 Series  
(and larger) single-rear-wheel long bed trucks

# Lance 992

Gold Rush interior

# Lance 1181

Compatible with domestic F-350/3500 Series  
(and larger) dually long bed trucks

Red Rock interior

Space? The 2010 Lance 1181 camper has the most floor space of all Lance campers. Once the full-wall slideout dinette/refrigerator/wardrobe closet is deployed, you'll feel like dancing – and there's room for you to do this. After a dusty trail ride, you'll enjoy the enormous dry bath – where the shower is separate from the toilet area. Then see the cabover's three-quarter-wall hanging closet wardrobe. And taking long items is a snap with a full-across basement storage area that runs the entire width of the camper. **Visit [LanceCamper.com](http://LanceCamper.com) for more info.**

This side-entry model is excellent for traditional campsite camping or towing. Add the optional fold-down rear tent and its foam mattress (whose interior can be seen on page 12) and dinette bunk bed, and you can actually sleep up to seven people. The bath area is excellent, the galley is completely functional, with lots of storage all around. The Lance 1191 has been used by many full-time RVers. **Visit [LanceCamper.com](http://LanceCamper.com) for more info.**

Sub-floor basement compartment area

**LanceLock** is our proprietary structural assembly process used in our 861, 992, 1181 and 1191 models to solidly integrate our rugged, aircraft-grade, .062-inch-wall-thickness aluminum frameworks. It's called "LanceLock" because of the special interlocking aluminum extrusions - that deliver outstanding strength and durability.

**ENGINEERING FACT**

The LanceLock extrusions ensure a precise fit of all structural components. It requires far less fasteners and ELIMINATES THE NEED FOR WOOD STICKS that most other truck camper manufacturers have to put inside their thinner aluminum tubing to have something "solid" to sink screws into for framing.

# Better-built truck campers simply because they have to be

Fully laminated walls, floor, ceiling and cabover bed floor for years of dependability

Since 1965, Lance has been producing some of the highest quality RVs available. If we don't build the best campers for our customers, we're out of business. It's just that simple.

precision-fitted **SOLID** block foam insulation throughout

Lance aluminum tubing is Alodine-coated - a chemical treatment process that greatly enhances adhesion for lamination bonding, and provides superior corrosion protection to the metal.

**.062"** Alodine-coated aluminum tubing

Superior corrosion protection with premium stainless steel and coated Everlube® fasteners

Electrical wiring is protected with tubing grommets inside the aluminum framing

Lance's double-seal process tightly seals joints for added weather-proof protection

The ultimate in stability and safety - interconnecting steel corner mounting plates both outside and inside solidly anchor front jacks to the camper structure

No water intrusion with sealed tail lights

Rear jacks attached to bumper

Heavy-duty Phat® ladder with stronger and larger diameter tubing

Powder-coated, non-rust aluminum bumper

Non-rust, stainless steel tie-down brackets with no paint to chip off

# Lance

custom interlocking aluminum extrusions

Frames are welded within a precision jig system to ensure true-to-square, tight-tolerance assemblies.

dealer-installed  
equipment

Installation of these support equipment systems by your Factory Authorized Lance Dealer is highly recommended to ensure you receive **The Ultimate Ride**. Experience a dramatic improvement in the drivability and handling of your truck and camper package – in any weather, on any road.

ASA's rear-view camera/monitor maximizes safety

When not towing loads that require an extended hitch, included in Reese's Tow Beast system is a reducer sleeve, which you use to reconnect the hitch ball and draw bar to the receiver hitch.

**REESE**  
CERTIFIED

The 48-inch Reese Tow Beast hitch box extension ("tow bar") is constructed with a heavy steel tube inside another steel tube – welded together – to dramatically increase strength and towing capacity.

Within Air Lift's Super Duty air springs ("air bags") are the Lance-exclusive internal jounce bumpers

Happijac Qwik-Load™ turnbuckle upgrades make anchoring your camper a snap

Lance-exclusive cabover shocks ("cabover struts") have quick-release stainless steel connectors

- 1 Reese® Tow Beast™ Class V hitch/extension system increases your towing capabilities over your truck's factory-stock hitch.
- 2 ASA® wireless rear-view camera/microphone and in-cab monitor lets you see – and hear – what's behind you.
- 3 Happijac® frame-mount anchoring system and front-mounted centering guides assist with center alignment within the truck bed.
- 4 Happijac front and rear turnbuckles safely and securely attach and anchor the camper to your truck.
- 5 Air Lift® Super Duty™ air springs ("air bags") increase stability and levels the rig by transferring rear axle load forward.
- 6 Rancho® RS-9000X front and rear shocks greatly improve ride in all weather and road conditions.
- 7 Air Lift Air-On-Demand™ in-cab control controls the air compressor and pressure for the air springs ("air bags") and shocks.
- 8 Lance Custom Design™ cabover shocks ("cabover struts") reduce the impact of up-and-down motion from irregular roads.
- 9 Rear-mounted centering guides assist in positioning your camper within the truck bed, and are available for most truck models.

# One of the many advantages of choosing a Lance truck camper as your RV is the ability to tow all your toys

REESE

When towing items behind larger Lance camper models, extending the hitch from the truck rearward to the camper bumper is necessary. (See chart at right for towing capacities of all models.)

The method Lance recommends involves a truck-mounted Class V receiver hitch and hitch box extension (as detailed in the 3-D view photos on the dealer-installed equipment section on the opposite page). A draw bar with hitch ball is inserted into the hitch box extension, the same way it would be inserted into the receiver hitch itself.

**Reese manufactures the Tow Beast Class V receiver hitch and hitch box extension specifically for truck camper applications. It replaces standard truck factory-stock receivers to allow for a greater towing capacity over factory-stock hitch systems.**

The other important benefit is that the Reese Tow Beast Class V system doesn't require you to attach the receiver hitch or hitch box extension to the camper. The hitch box extension can be in place when loading or unloading your camper. For very heavy loads, the hitch box extension in combination with a weight-equalizing hitch can be used. The chart at the lower right gives capacities for Reese's Tow Beast Class V hitch box extensions.

Always observe your truck's tow ratings – and the advice of your Factory Authorized Lance Dealer. Their service teams have the knowledge, experience and skill to outfit your rig correctly.

## Tow capacities for Lance models requiring only a Reese Tow Beast Class V receiver hitch

	Weight carrying/ tongue weight	Weight distributing/ tongue weight
Lance 850	12,000 pounds/ 1200 pounds	14,000 pounds/ 1400 pounds

**BE SAFE - Always consult your Factory Authorized Lance Dealer for professional technical advice and proper equipment installation.**

## Tow capacities for Lance models requiring both a Reese Tow Beast Class V receiver hitch and hitch box extension

	Weight carrying/ tongue weight	Weight distributing/ tongue weight	Length of cut extension
Lance 825			24"*
Lance 830			
Lance 855			
Lance 861	6000 pounds/ 600 pounds	8000 pounds/ 800 pounds	
Lance 865			
Lance 950			
Lance 992			
Lance 1040			
Lance 1181	5000 pounds/ 500 pounds	7500 pounds/ 750 pounds	41"*
Lance 1191			

\*A universal heavy-duty 34" or 48" factory-stock Reese extension is cut down by a technical service professional to fit your particular application.

\*Dealer modifications required. Consult your Factory Authorized Lance Dealer for professional technical advice and proper equipment installation. All above weights, dimensions and capacities are approximate values – and subject to change without notice. All measurements are based on an 8.75-inch standard drop ball mount. Some capacities may vary depending on vehicle application. Be safe – always consult with your Factory Authorized Lance Dealer beforehand.

# Own a truck? You're halfway to a great RV.

Why now – more than ever – a Lance truck camper makes sense as your RV-of-choice.

**Versatility** A Lance camper and pickup truck combination is like owning four different vehicles in one.

A comfortable motorhome. A powerful tow vehicle. An all-season, all-terrain RV. A second car around town. And only a Lance camper allows you to select so many options to suit your individual needs. Your Lance can be as versatile as you need it to be.

**Flexibility** Tow any of your toys. Boat, horse trailer, motorcycles, cargo trailer, snowmobiles, ATVs. Whatever.

At camp, uncouple your toy trailer – unload your camper with pushbutton ease – and you're free to take your truck and travel. And because your Lance is fully self-contained, there's no need for hookups – so you can travel and camp places other RVs dare not go.

**Handling** No other RV maneuvers like a Lance camper – especially with a four-wheel-drive truck. On or off the road, a Lance handles like a single, integrated unit with your truck – and there's no need to get used to a new vehicle. Turns are tighter. No trouble backing-up. Parking is simple. Driving up or down grades is easier. And snow, sand and streams are less of a problem. You can really get away from it all in a Lance.

**Affordable** Own a truck? You're already halfway to a great RV.

With a purchase price far less than a motorhome, a Lance actually costs less to own and operate, too. No registration. Minimal insurance. No storage costs if stored at home. Better fuel economy. The lowest-cost maintenance of any RV. A well-engineered, well-built, high-quality product that keeps its resale value better than any other RV on the road.
